Eminent Future is a product and innovation company.

We drive government innovation and societal change.

FedRAMP Compliant Websites & Apps

Eminent developed two public-facing websites on secure FedRAMP approved cloud infrastructure using Microsoft Azure and Human-Assisted AI tools. When deploying CMS systems on our PaaS, we implement and manage all the controls required for full application-level FedRAMP compliance. We also provide DOD agencies with a System Security Plan (SSP) and the evidence they need to grant an Authority to Operate (ATO) for the website. With this approach, we modernized two public-facing websites for Defense Human Resources Activity in under 12 months. Both web platforms are fully compliant, meeting all DOD security standards.

Federal software made easy with AI

Prior Project Successes

Eminent developed two public-facing websites on secure FedRAMP approved cloud infrastructure using Microsoft Azure and Human-Assisted AI tools. When deploying CMS systems on our PaaS, we implement and manage all the controls required for full application-level FedRAMP compliance.

Eminent modernized and enhanced a document clearance application for the State Department. We moved our client away from a stovepipe application and on to the Microsoft Power Platform.

Eminent modernized and optimized the hiring and recruiting process for DOD
