FedRAMP Compliant Websites & Apps

Eminent Future develops public-facing websites on secure, FedRAMP-approved cloud infrastructure using Microsoft Azure and Human-Assisted AI tools. When deploying CMS platforms on our PaaS environment, we implement and manage all necessary controls to achieve full application-level FedRAMP compliance. We also support DOD agencies by preparing System Security Plans (SSPs) and the documentation required to obtain an Authority to Operate (ATO). This approach has enabled us to efficiently modernize digital systems for federal clients—delivering secure, compliant applications that meet all DOD cybersecurity and performance standards.

Federal software made easy with AI

Prior Project Successes

Eminent modernized and enhanced a document clearance application for the Department of State, transitioning the process from legacy stovepipe systems to the Microsoft Power Platform for improved efficiency and scalability.

We also optimized the hiring and recruitment workflow for the DOD Civilian Careers platform, streamlining the user experience and accelerating applicant processing timelines.

For the Department of State, we developed an AI-powered chatbot approved to handle Sensitive But Unclassified (SBU) data. Designed to minimize manual research, the tool delivers instant access to relevant policies, procedures, and resources—putting actionable knowledge directly in the hands of users.

Additionally, we built an organizational health dashboard that equips DOS leadership with real-time insights into workforce engagement, trends, and key performance metrics to support informed decision-making.

Eminent Future is a product and innovation company.

We drive government innovation and societal change.

CORE COMPETENCIES:

SOFTWARE DEVELOPMENT AND INTEGRATION

- Microsoft .NET
- Microsoft SQL Server
- PowerApps
- Power Automate
- Power BI
- Microsoft O365
- React JS/Angular
- WordPress/Drupal
- Tableau
- SharePoint
- Oracle DB
- Python
- Databricks

IT INFASTRUCTURE AND SUPPORT

- Windows Server
- VM Ware
- Thin Clients

CYBER SECURITY

- Information Assurance
- Data Security
- Code Hardening

DATA ANALYTICS & BLOCKCHAIN

- Smart Contracts
- Blockchain Deployment

CONTRACT VEHICLES

- GSA IT Schedule 70
- Navy Seaport-NxG
- Air Force SBEAS

Artificial Intelligence

- OpenAI
- Palantir
- Copilot
- Chat Models
- LLMs
- Azure OpenAI Service

Marine Veterans Building Innovative Products

RELEVANT PAST PERFORMANCE:

AS PRIME

- Low-Code Development, Ai Integration And Dashboard Analytics For The Department Of State.
- Brand Management, Website Development & Fedramp Cloud Infrastructure For Defense Civilian Personnel Advisory Service & Dod Civillian Careers
- It Infrastructure And Support For Us Navy
- Developed interfaces between Python, Node.js, and CODESYS to bridge industrial machinery with real-time data systems for Boeing

AS SUBCONTRACTOR

Managing Agile Software Development for the White House Executive Office of the President (EOP)
Delivering Agile Development and Information Assurance Solutions for the U.S. Army
Providing Scalable Agile Support to the U.S. Navy and Marine Corps

DIFFERENTIATORS:

SDVOSB
DISA Approved FedRAMP websites
508 Compliance, WCAG and other legal compliance
Transparent Agile Management
Access to our leadership and experts throughout life of projects
Current SBA Mentor-Protege with ECS Federal
Partnered with ANCs, NHOA, & WOSB to help meet government requirements

NAICS CODES:

541430 Graphic Design Services
541511 Custom Computer Programming Services
541512 Computer Systems Design Services
541513 Computer Facilities Management Services
541519 Other Computer Related Services

Bottom line: We make things better.
